

Data privacy statement

The Society maintains a database of alumni which it keeps for the purpose of inviting alumni to events organised by the Society. In some cases alumni have supplied us with personal data including their email address, college, university, year of matriculation and special dietary requirements. The Society may make available to dinner guests a list of all alumni attending the dinner with details of their college, university and year of matriculation. Details of any special dietary requirements you may have will be given to the caterers for an event. If you wish to have your name and personal data deleted from our database, please let us know at any time and we will attend to your request
